

geometrik.com

## APPLICATIONS

- Ceilings & Walls
- Auditoriums & Conference Rooms
- Airports
- Home Theatres
- Lobbies & Reception Areas
- Multipurpose Areas
- Banks & Executive Boardrooms
- Schools, Colleges & Universities
- Large Open Office Spaces
- Performance Spaces
- Worship Facilities
- Hospitals & Health Centres

## AVAILABLE LEED CREDITS\*

- MR 4: Recycled content
- MR 5: Locally manufactured & harvested materials
- MR 6: Rapidly Renewable Materials
- MR 7: FSC Chain of Custody Certification
- EQ 4.2: Low VOC Finishes
- EQ 4.4: Composite panels: No Added Urea Formaldehyde

\* Must be specified prior to tender and ordering.

## POPULAR WOOD SELECTION\*\*

Douglas Fir

Western Cedar

Western Hemlock

Western Birch

Alder

Walnut

Cherry

Mahogany

Euro Steamed Beech

Bamboo

Ash

White Maple

Red Oak

White Oak

\*\* Contact the manufacturer for other wood species availability. Due to the nature of real wood (variation in grain, texture and color) the finished product may range from light to dark.

# GEOPANEL MICROPERFO S - WOOD CEILING AND WALL PANELS

## SPECIFICATION

Species:	Veneer, HPL (contact Sales for options)
Core:	MDF (optional black MDF)
Acoustic panel:	3/4" thick Custom panel: up to 4' x 10' Tongue & groove plank: up to 1' x 10' Ceiling tile: 2'x2', 2'x4', 2'x8'
Style:	Perforated Ø 0.5mm / 2mm OC diagonal pattern Perforated Ø 0.9mm / 4mm OC square pattern
Edge:	Panel: Edge banded Plank: Tongue & groove Ceiling tile: Lay-in Tegular edge Concealed side groove
Finish:	20 sheen clear low VOC (optional 5 sheen)
Stain:	Geometrik standard stain selection or custom to match architect's control sample
Backing:	Black non-woven acoustic fabric
Fire treatment:	Class A (available upon request)
Panel weight:	Approx. 2 lbs/sf

## PRODUCT DESCRIPTION

Geometrik's illustrious product, MicroPerfo S, is not only acoustically high performing, it provides the most prestigious and exclusive impression of striking uninterrupted wood.

The Geopanel MicroPerfo S products provide an almost unnoticeable perforation while achieving a high NRC rating resulting in a visually silent acoustic solution on ceilings or walls in any multi-purpose facility. How soundwaves travel in enclosed areas can dramatically affect the human ear experience. For example, long or narrow areas cause soundwaves to bounce back and forth resulting in a long reverberation time making speech unintelligible. MicroPerfo S Panels, available in two perforations/patterns, acoustically absorb the flutter echoes to achieve an acoustic solution along with absorption coefficient materials used in the construction of the room.

See Geometrik Binder for details or call our technical support team 1-888-306-0024 for more information.

## BENEFITS

- Almost unnoticeable perforation
- Typically suspended from 15/16" Prelude XL HD (heavy duty) #7301 Main T-Bars by AWI or similar.
- Easy installation using standard hardware or custom engineered installation hardware
- High NRC rating
- Contribute towards LEED certification
- Choice of veneer (optional black MDF), HPL (contact Sales for options)
- Compatible to a seismic installation

## ENVIRONMENTAL STATEMENT

*As part of our ongoing commitment, we put every effort in preserving our forest for future generations. That is why we actively promote panels made of engineered wood that is environmentally friendly, easy to recycle, made of recycled fiber and has a low impact on the environment. Geometrik is offering wood ceiling and wall panels that are manufactured using environmentally preferable products (EPP) such as low emitting sustainable fiberboard (SDF) that contains pre-consumer and/or post-consumer recycled fiber and has no added urea formaldehyde. We use low VOC finishes to further contribute to sustainable design.*
