

APPLICATIONS

- Ceilings & Walls
- Auditoriums & Conference Rooms
- Airports
- Home Theatres
- Lobbies & Reception Areas
- Multipurpose Areas
- Banks & Executive Boardrooms
- Schools, Colleges & Universities
- Large Open Office Space
- Performance Space
- Worship Facilities
- Hospitals & Health Centres

AVAILABLE LEED CREDITS*

- MR 4: Recycled content
- MR 5: Locally manufactured & harvested materials
- MR 6: Rapidly Renewable Materials
- MR 7: FSC Chain of Custody Certification
- EQ 4.2: Low VOC Finishes
- EQ 4.4: Composite panels: No Added Urea Formaldehyde

** Must be specified prior to tender and ordering.*

GEOPANEL "SONATA" - WOOD ACOUSTICAL CEILING AND WALL PANELS

SPECIFICATION

Species:	Veneer, HPL (contact Sales for options)
Core:	Composite
Acoustic panel:	1-1/2" to 2-1/2" thick with insulation Custom size flat or curved
Style:	Perforated/non-perforated Slotted Round square Grooved
Edge:	Edge banded
Finish:	20 sheen clear low VOC (optional 5 sheen)
Stain:	Geometrik standard stain selection or custom to match architect's control sample
Backing:	Black non-woven acoustic fabric within composite
Fire treatment:	Class A (available upon request)
Panel weight:	Approx. 3-1/2 lbs/sf

PRODUCT STYLES

SO-2832SP-CS
Perforated

SO-2200SL-CS
Slotted

SO-2300RS-CS
Round Square

SO-1000-CS
Grooved

PANEL CONSTRUCTION

Geopanel Sonata has a composite construction consisting of an acoustical membrane attached to the panel frame. There is a factory encapsulated acoustical core inside the panel. Acoustic membrane comes in variety of styles.

PRODUCT DESCRIPTION

Geopanel Sonata panels are unique because they can be used where traditional acoustical installation is not possible or required.

Geopanel Sonata panels offer the acoustic solution to clear, intelligible words and music in areas where concerts, conferences, presentations and any other performances are held. Basic factors that affect a room's reverberation time include the size and shape of the enclosure as well as the absorption coefficient of materials used in the room construction.

The composite assembly of Geopanel Sonata achieves high levels of noise reduction coefficient (NRC). Required NRC is achieved by choosing the appropriate acoustical membrane. Sonata panels come in a variety of styles and are simple and efficient to install.

See Geometrik Binder for details or call our technical support team 1-888-306-0024 for more information.

BENEFITS

- Wide variety of perforation patterns
- Easy installation using standard hardware or custom engineered installation hardware
- Reduced installation costs
- High NRC rating
- Contribute towards LEED certification
- Choice of veneers
- Compatible to a seismic installation

ENVIRONMENTAL STATEMENT

As part of our ongoing commitment, we put every effort in preserving our forest for future generations. That is why we actively promote panels made of engineered wood that is environmentally friendly, easy to recycle, made of recycled fiber and has a low impact on the environment. Geometrik is offering wood ceiling and wall panels that are manufactured using environmentally preferable products (EPP) such as low emitting sustainable fiberboard (SDF) that contains pre-consumer and/or post-consumer recycled fiber and has no added urea formaldehyde. We use low VOC finishes to further contribute to sustainable design.
